Flu is a common disease among children. It often starts in the autumn and ends in the spring. Flu and cold can be similar because they have the same symptoms: fever, headache, coughing, runny nose and sore throat. Children can easily get flu because flu viruses move quickly from person to person when they share things with each other. When kids have flu, they shouldn't go out because other kids can get the virus. Kids should stay at home, get a lot of rest, drink a lot of water and eat healthy food. They should only go out when the flu is over.

*Common:* phổ biến.                      *similar:* tương tự như nhau.                      *Symptom:* triệu chứng.
